

Public Transportation: The Importance Of Bus Transportation

2.4 Important of bus transportation According to Desaulniers & Hickman (2007) said to reduce pollution, reduces traffic congestion and as well as increasing the mobility of the population is a social mission to agencies that related with public transit. Therefore, all organisations that other such as airlines, railroads, and trucking companies having the goal is usually not to make profits. Public transits have several advantages and needing all people using public transit especially of public stage [bus](#).

2.4.1 Reduce congestion

The condition of the road will undergo congestion when many people using the road at peak hour to move from one destination to another destination. Hence, Madzlan and Noorfakhriah (2010) said peak hour is a...*show more content...*

This is because public transit currently serves a relatively small portion of trips in most communities, but the trips it serves tend to be high value to users and society. The people can use public transit that provided by transit are the basic movement for helping people in the activity of crucial such as medical services, education, and employment. According to Abir & Hoque (2011) said that, in reducing poverty, improved access and mobility are considered as most important factors to public [transportation](#). This is because important of public transit also is improve mobility to ease the participation of disabled people in economic and social processes. The disable people can use public transit to move from one place to another place. Besides that, Odufuwa (2006) state that to improving mobility also will involving public especially elderly that using service of transport for starting journey provides information about the services, being able to use them and having the means to pay for the service. Based on supply and demand, mobility in transportation related travel behavior people travels to access people and places. Important of transportation is show concept mobility of the elderly needs to be understood beyond the analysis of numbers of...*show more content...* As better service quality in public transportation attracts more commuters it will address not only urban pollution, but also it will solve the traffic problem in most of the cities (Randheer & Al-Motawa 2011) .Therefore, [public transport](#) will give comfortable to the public especially in an urban area because pollution can be reduced. People are encouraged to use the public bus without using private transport to go any
